Subject: proposal of Rate Hike from SCE&G

To whom this may concern

I believe the rate hike of 9.52% is way more than any of the SCE&G customers can stand, Especially at this time when the economy is like it is. The financial hardship it will put on a lot of business and residential customers will be great. Our senior citizen like myself on fixed incomes will have to struggle to pay for Electric service and for many it will mean more financial hardship plus it could mean raising Rates on services like Hospitals, stores Etc.

Please take into consideration the many things that will be a burden to, before approving this Rate Hike

Sincerely
John Calvert
